## **DETAILED ACTION**

### ***Acknowledgments***

1. The Examiner acknowledges that the Office Action of 04 May 2007 should have been a non-final Office Action. The finality of the 04 May 2007 Office Action is withdrawn. The Office Action is being re-issued below with the response period as set forth at the end of the Office Action. This communication is in response to Applicant's Remarks filed 30 January 2007.

### ***Status of Claims***

2. Claims 1-10 are currently pending. Claim 1 is an independent claim.

### ***Claim Rejections – 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 and 5-7 are rejected under 35 U.S.C. 112, second paragraph, for lack of antecedent basis. Claims 1 and 5-7 recite the limitation "the maker's quote" in the claim language and there is no antecedent basis in the claims.

5. Claim 1 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the language "permitted to accept" in the claim language. It is unclear to the Examiner what is covered by this language. Does this mean the trader is permitted to view the quote or permitted to fulfill the quote? Appropriate correction is required.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The Specification is enabling for making a determination when the number of traders equals or exceeds a predetermined percentage previously stored in said memory of the system. The Specification is not enabling for other methods of generating the predetermined percentage (e.g. previous entry, historical average etc.) Additionally, claims 1-10 contain the language "informing the maker" but do not disclose how the

Art Unit: 3693

maker is informed. The Examiner would suggest that the claim disclose that the maker is informed via the computer system.

### ***Allowable Subject Matter***

The following is a statement of reasons for the indication of allowable subject matter: the claims disclose a method, system and apparatus for alerting a maker in a computerized trading system that his offer is subject to being accepted by a predetermined percentage of traders, which is not disclosed by the prior art. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
